Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the specification:.

Listing of Claims:

Claims 1-99. (Cancelled)

- Claim 100. (Previously presented) A nucleic acid probe which (a) is at least 15 nucleotides in length and (b) hybridizes specifically to a nucleic acid having a sequence set forth in SEQ ID No.

 1.
- Claim 101. (Previously presented) A nucleic acid probe which (a) is at least 15 nucleotides in length and (b) hybridizes specifically to a nucleic acid having a sequence complementary to the DNA sequence set forth in SEQ ID No. 1.
- Claim 102. (Previously presented) The nucleic acid probe of claim 100 or 101, wherein the nucleic acid probe is DNA.
- Claim 103. (Previously presented) The nucleic acid probe of claim 100 or 101, wherein the nucleic acid probe is RNA.

Serial No.: 08/403,803 Filed: March 17, 1995

Page 6

Claim 104. (Previously presented) The nucleic acid probe of claim 100 or 101, wherein the nucleic acid probe is labeled with a detectable marker.

Claim 105. (Previously presented) The nucleic acid probe of claim 104, wherein the detectable marker is a radioactive label or fluorescent label.

Claims 106-112. (Cancelled)

Claim 113. (Currently amended) An isolated nucleic acid which encodes an antigenic prostate specific membrane antigen polypeptide comprising consecutive amino acids, the sequence of which amino acids corresponds to the sequence of all or less than all of an outside region of prostate specific membrane antigen, the amino acid sequence of which outside region is set forth within SEQ ID NO:2 beginning with amino acid number 45 at the amino terminus, provided that the prostate specific membrane antigen polypeptide so encoded is characterized by antigenicity.

Claim 114. (Currently amended) An isolated nucleic acid which encodes an antigenic prostate specific membrane antigen polypeptide consisting essentially of consecutive amino acids, the sequence of which corresponds to the sequence of all or less than all of an outside region of

Serial No.: 08/403,803 Filed: March 17, 1995

Page 7

prostate specific membrane antigen, the amino acid sequence of which outside region is set forth within SEQ ID NO:2 beginning with amino acid number 45 at the amino terminus of the polypeptide, which encoded prostate specific membrane antigen polypeptide is characterized by antigenicity and comprises each of the following sequences:

- (a) Asp-Glu-Leu-Lys-Ala-Glu (SEQ ID NO: 35);
- (b) Asn-Glu-Asp-Gly-Asn-Glu (SEQ ID NO: 36); and
- (c) Lys-Ser-Pro-Asp-Glu-Gly (SEQ ID NO: 37).

Claim 115.

(Currently amended) An isolated nucleic acid which encodes an antigenic prostate specific polypeptide membrane antigen consisting essentially of a fragment of prostate specific membrane antigen, which fragment has a sequence which is the same as the sequence of all or less than all of an antigenic outside region of prostate specific membrane antigen, the amino acid sequence of which outside region is included within SEQ ID NO:2 beginning with amino acid number 45 at the amino terminus of the fragment, which encoded prostate specific membrane antigen fragment is characterized by antigenicity comprises and each the following sequences:

- (a) Asp-Glu-Leu-Lys-Ala-Glu (SEQ ID NO: 35);
- (b) Asn-Glu-Asp-Gly-Asn-Glu (SEQ ID NO: 36);

and

(c) Lys-Ser-Pro-Asp-Glu-Gly (SEQ ID NO: 37).

- Claim 116. (Previously presented) An isolated nucleic acid having within its structure at least 15 consecutive nucleotides having a sequence which is present in the sequence set forth in SEQ ID NO:1 and encoding a fragment of prostate specific membrane antigen.
- Claim 117. (Previously presented) An isolated nucleic acid having within its structure at least 15 consecutive nucleotides having a sequence which is complementary to a sequence present in the sequence set forth in SEQ ID NO:1.
- Claim 118. (Previously presented) The isolated nucleic acid of claim 116, wherein the isolated nucleic acid encodes an antigenic domain of prostate specific membrane antigen.
- Claim 119. (Previously presented) The isolated nucleic acid of claim 116, wherein the fragment has a sequence which is the same as a sequence of all or less than all of an outside region of prostate specific membrane antigen, the amino acid sequence of which outside region is set forth within SEQ ID NO:2 beginning with amino acid number 45 at the amino terminus.

Serial No.: 08/403,803 Filed: March 17, 1995

Page 9

- Claim 120. (Previously presented) An isolated nucleic acid which encodes an antigenic fragment of prostate specific membrane antigen, which fragment is characterized by antigenicity and has a sequence which is the same as a sequence of all or less than all of an outside region of prostate specific membrane antigen, the amino acid sequence of which outside region is set forth within SEQ ID NO:2 beginning with amino acid number 45 at the amino terminus.
- Claim 121. (Previously presented) An isolated nucleic acid which is at least 15 nucleotides in length and specifically hybridizes to the nucleic acid of any one of claims 113-120.
- Claim 122. (Previously presented) A vector which comprises the isolated nucleic acid of any one of claims 113-120.
- Claim 123. (Previously presented) The vector of claim 122, wherein the vector is a plasmid.
- Claim 124. (Previously presented) A host vector system for the production of a polypeptide which comprises the vector of claim 122 and a suitable host cell.
- Claim 125. (Previously presented) The host vector system of claim 124, wherein the suitable host cell is

Serial No.: 08/403,803 Filed: March 17, 1995

Page 10

a bacterial cell, insect cell, or mammalian cell.

Claim 126. (Previously presented) A method of producing a polypeptide which comprises using the host vector system of claim 125 under suitable conditions permitting production of the polypeptide and recovering the polypeptide so produced.
